GIDEON KIPROTICH

Information Technology Graduate · Software, GIS & Cybersecurity Enthusiast

Email: gideonkipro001@gmail.com
Phone Number: +254 768 542 405

CURRICULUM VITAE

PROFESSIONAL SUMMARY

Self-driven and tech-savvy Information Technology graduate with a strong foundation in programming, networking, and geospatial technologies, built through hands-on hackathons, AI bootcamps, and specialised mentorship programs. Passionate about software development, cybersecurity, and GIS-driven problem solving, with a proven record of effective teamwork, creativity, and adaptability. Eager to contribute technical skill and fresh thinking to a forward-looking IT or cybersecurity team.

EDUCATION

Kabarak University *2022 – 2025*
Bachelor's Degree in Information Technology

Kericho High School *2018 – 2021*
Kenya Certificate of Secondary Education (KCSE)

Our Lady of Victory Primary School *2008 – 2017*
Kenya Certificate of Primary Education (KCPE)

TECHNICAL SKILLS

- Programming Languages: Python, PHP, JavaScript
- Geographic Information Systems (GIS): QGIS, digital mapping and spatial data fundamentals
- Remote Sensing: satellite and drone imagery for land and environmental monitoring
- IT & Programming Fundamentals
- Networking (Cisco CCNA foundations)
- Cybersecurity principles and best practices

EXPERIENCE

Interschool Hackathons

- Collaborated in fast-paced coding competitions, designing and building functional prototypes under tight deadlines.
- Strengthened rapid prototyping, teamwork, and problem-solving skills through team-based development sprints.
- Presented working solutions to judging panels, translating technical work into clear, concise pitches.
- Contributed to shared, version-controlled codebases in team settings, reinforcing collaborative development practices.

AI Bootcamps

- Gained hands-on experience applying core artificial intelligence and machine learning concepts through structured, practical training.
- Built and tested small-scale AI models, translating theoretical concepts into working solutions.
- Practised data preprocessing and model evaluation techniques to improve prediction accuracy.
- Worked in cross-functional teams to scope problems, iterate on solutions, and present outcomes to peers and mentors.

GIS Mentorship Program – e4impact Kenya (2026)

- Participated in a mentorship program focused on GIS fundamentals and digital mapping, gaining practical exposure to tools such as QGIS.
- Learned to collect, visualise, and interpret spatial data to support informed, location-based decision-making.

- Explored remote sensing principles, including the use of satellite and drone-captured imagery for land and environmental monitoring.
- Applied geospatial thinking to real-world, impact-oriented project scenarios alongside fellow mentees.
- Received guidance from industry mentors on structuring GIS projects for real-world impact and sustainability.

Academic & Personal Projects

- Designed and developed small-scale web applications using PHP and JavaScript, covering front-end interfaces and back-end logic.
- Wrote Python scripts for automation, data handling, and problem-solving exercises to reinforce core programming concepts.
- Configured and tested basic network setups to apply Cisco CCNA fundamentals in practical scenarios.
- Explored core cybersecurity concepts, including safe coding practices and basic vulnerability awareness, through self-directed study.

CERTIFICATIONS & ACHIEVEMENTS

- Cisco CCNA Networking – Modules 1 & 2 (Certified)
- Skies Mentorship Program – Cybersecurity Track (Certified)
- GIS Mentorship Program – e4impact Kenya (2026)

REFEREES

Available on request.
